

Specialized Programming Aids for TI-59 Handheld Calculator

Specialized computer programming aids are now available from Texas Instruments for use with the TI programmable 59 handheld calculator. These aids offer easier conversion of ASCII and EBCDIC codes, routines for

debugging and analyzing TMS 9900 and Intel 8080 processor programs, and a number of general programmer aids covering base conversions and logical and arithmetic operations.

The Programmer's Aid Pakette is a 64 page booklet providing detailed documentation for six full length programs: EBCDIC code converter, ASCII code converter, ASCII and EBCDIC encoder, TMS 9900 disassembler, Intel 8080 disassembler and TI programmer simulator. All require a TI-59 with attached PC-100A thermal printer, plus blank TI-59 magnetic program cards, into which the user keys the code lists for automatic entry into the calculator. The booklet format includes program listings which are keyed into the user's own magnetic cards; no additional programming is required.

Pakettes are also available on securities, statistical testing, civil engineering, electronic engineering, blackbody radiation, oil/gas/energy, astrology and TI-59/PC-100A printer utilities.

All pakettes are priced at \$10 with a \$1.50 handling charge plus state and local taxes. For further information write to Texas Instruments Inc, Service Facility, POB 53, Lubbock TX 79408.■
